

Planet Waves DIY Kits

Everyone can make cables!

The Planet Waves DIY Cable Making Kits are perfect for even the most novice consumer as this instant interconnect system is so easy to assemble anyone can do it! It is as simple as cutting the cable to length, applying the appropriate connector & fastening the set screw to secure the connection. There is even a tester included to ensure proper termination.

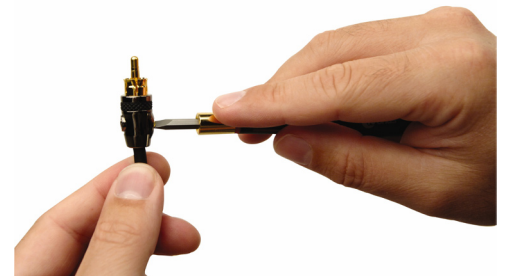

It may sound too good to be true but, it really is as easy Cut, Twist & Screw!

Features & Benefits

- Just 1 cable for all applications - takes the guess work out of connecting complex A/V systems
- High quality product meets even the most demanding HD performance standards
- Features Planet Waves' In = Out(TM) technology for pure signal transparency
- Custom length cables provide a neat & clean look - no more coiling excess cable
- Completely repeatable assembly — re-use connectors for new applications or devices
- So versatile you can make any cable necessary for Audio/Video applications
- Complimentary products available should your home theater require more device hook-ups
- Simple 3-step assembly process — Cut, Twist & Screw

In all kits there is a tester included to ensure proper termination.
