

Music and Movie Lovers

One of the first media servers in the industry is still the standard-bearer and first choice for premier custom home entertainment integration.

Centralize your entire media collection into one easy and intuitive system with the **F.Series Media Server**. With room for thousands of songs and hundreds of movies plus the ability to expand with Network Attached Storage, the F.Series puts an entertainment universe at your fingertips.

The F.Series was designed from the beginning with your home in mind. Combine it with an **IMC Intelligent Media Client** and instantly add thousands of hours of streaming music and video plus an ever-expanding range of online content to any existing system.

Movies, music, photos and more - bring your home entertainment system to life with the power of ReQuest.

- 1 Terabyte of Built-In Storage
- 2 and 4 zone models available
- Automatic Dual Encoding for high fidelity audio at home and smaller files for streaming and portability
- NetSync technology keeps media collections in sync across multiple homes
- NetSync for iTunes allows multiple iPod and iTunes users to integrate their libraries with the ReQuest system
- Listen to your music anywhere you can access the internet
- Watch hundreds of DVD movies plus online video content

ReQuest
SERIOUS PLAY

The ReQuest
