***Does not support Rhapsody's proprietary playlists.

Disclaimer: The Universal Plug-n-Play (UPnP) media servers and players listed above have been tested and found to be compatible with NevoSL®. UEI makes no promises, guarantees or commitments that previous or future firmware/software releases for these media servers and players will perform similarly. Where appropriate, compatibility testing was performed using latest releases of NevoMedia Server™ and NevoMedia Player™, and is considered up-to-date as of November 8, 2005. Other devices will be added or removed from this list as future releases and compatibility testing dictates.
